Some alternative questions

- **What are the main research areas ?**
- **How do we bridge research and practice?**
 - Getting research results applied
 - Performing relevant research
- **Are there cultural differences which are relevant for design and implementation of mobile applications ?**
- **State of 2010: What kind of mobile applications will we have in five to ten years?**
 - What are the enablers for making this happen?
 - What are the limitations / threats to prevent this happening?
